(a) Signed storage schedules are convex
water: 0/40 violations
depleted gas: 0/40 violations
pair rank
midpoint gap δ (%) (> 0 = non-convex)
(b) Optimal cycles, Π ≈ 0.4
Dieterich optimum
Kaiser optimum (lexicographic)
robust (min-max)
constant
rate multiplier (+ inject, − withdraw)
time (d)
(c) Memory-model regret
Π ≈ 4
Π ≈ 0.4
cost under Dieterich
cost under Kaiser
excess over model optimum (%)
const.
Dieterich opt.
Kaiser opt.
robust
